From Wikipedia, the free encyclopedia

"List of largest cities in the United States" redirects here. For a list of largest cities by area, see [List of United States cities by area](#).

This is a list of the most populous [municipal corporations](#) of the [United States](#). As defined by the [United States Census Bureau](#), an [incorporated place](#) includes [cities](#), [towns](#), [villages](#), [boroughs](#), and [municipalities](#).^[a] A few exceptional [census-designated places](#) (CDPs) are also included in the Census Bureau's listing of incorporated places.^[b] [Consolidated city-counties](#) represent a distinct type of government that includes the entire population of a county, or county equivalent. Some consolidated city-counties, however, include multiple incorporated places. This list presents only the portion of such consolidated city-counties that are not a part of another incorporated place.

This list refers only to the population of individual municipalities within their [defined limits](#); the populations of other municipalities considered [suburbs](#) of a central city are listed separately, and unincorporated areas within [urban agglomerations](#) are not included. Therefore, a different ranking is evident when considering [U.S. urban areas](#) or [metropolitan areas](#).

50 states and the District of Columbia
